FREE PROMPT PACK

30 AI prompts
for busy professionals

Copy. Paste. Save an hour.

Works in ChatGPT, Claude and Gemini.

- Email (6)
- Meetings (5)
- Writing (5)
- Spreadsheets & data (5)
- Planning & productivity (5)
- Learning & thinking (4)

@busy.at.work

How to use this pack

1. Replace everything in [brackets] with your own details.
2. Paste your text (email, notes, data) first, then the prompt.
3. Not happy? Reply with "shorter", "more formal" or "give me 3 options".
4. Never paste confidential data your company does not allow in AI tools.
5. Always read the result once before you send it. You know the context, the AI doesn't.

Email

1 Catch up on a long thread

Summarize this email thread in 5 bullet points. Then list: decisions made, open questions, and anything someone is asking ME to do, with deadlines.

2 Reply in 3 tones

Rewrite this reply in 3 versions: friendly, neutral and firm. Keep each under 100 words and don't change the facts.

3 Say no politely

Help me decline this request politely. Keep the relationship warm, give a short reason, and offer one alternative. Max 5 sentences.

4 Chase a late reply

Write a short follow-up to this email. Friendly, not pushy, with one clear question I need answered by [date].

5 Turn notes into an email

Turn these rough notes into a clear email to [person]. Start with the main point, use short paragraphs, end with the next step.

6 Inbox triage

Here are my unread email subjects and senders. Sort them into: reply today, reply this week, delegate, archive. One line of reasoning each.

Meetings

7 Clean action list

```
Turn these meeting notes into: 1) decisions, 2) action items as a table
(task, owner, deadline), 3) open questions. Mark anything unclear with
(?).
```

8 Prep in 2 minutes

```
I have a meeting about [topic] with [who]. Give me 5 smart questions to
ask, 3 risks to raise and one sentence to open with.
```

9 Agenda builder

```
Create a 30-minute agenda for a meeting about [topic]. Include time per
item, who leads it, and the decision we need at the end.
```

10 Follow-up email

```
Write the follow-up email for this meeting: thank-you line, 3 key
takeaways, action items with owners and deadlines.
```

11 Could this be an email?

```
Here is the meeting invite and agenda. Tell me honestly if this could be
an email instead, and draft that email if yes.
```

Writing

12 Ask me first

```
[your task]. Before you answer, ask me up to 5 questions you need to do this well.
```

13 The 4-part prompt

```
You are [role]. Task: [what you need]. Context: [key details]. Format: [length, tone, structure].
```

14 Make it shorter

```
Cut this text by 40% without losing any key facts. Keep my tone. Show the new version only.
```

15 Make it clearer

```
Rewrite this for someone who is busy and not an expert. Short sentences, no jargon, the most important point first.
```

16 Critique my draft

```
Act as a tough but fair editor. List the 5 biggest problems in this draft and how to fix each one. Don't rewrite it yet.
```

Spreadsheets & data

17 Formula from plain English

I use [Excel/Google Sheets]. Column A has [data], column B has [data], data starts in row 2. Give me a formula that [goal]. Explain it in one sentence.

18 Explain this formula

Explain what this formula does, step by step, in plain English. Then tell me one way it could break: [formula]

19 Clean messy data

Here is messy data. Standardize names, dates (YYYY-MM-DD) and capitalization, remove duplicates, and return it as a table.

20 Find the story in numbers

Here is a table of [data]. Give me the 3 most important insights, one surprise, and one question I should investigate.

21 Build a simple tracker

Design a simple spreadsheet to track [thing]: list the columns, an example row, and 2 formulas that make it useful.

Planning & productivity

22 Plan my week

Here are my tasks and deadlines. Build a realistic weekly plan with focus blocks, buffer time, and my top 3 priorities each day.

23 Break down a big task

Break [project] into steps of max 30 minutes each, in order. Mark which ones I can delegate.

24 Decide faster

I'm deciding between [option A] and [option B]. Give me pros, cons, risks, and which you'd choose and why, in under 150 words.

25 Write the SOP

Turn this process description into a clear step-by-step checklist someone new could follow without asking me questions.

26 End-of-day review

Here's what I did today and what's left. Write a 5-line summary for my manager and my top 3 tasks for tomorrow.

Learning & thinking

27 Explain like I'm new

```
Explain [topic] like I'm smart but new to it. Use one everyday analogy
and finish with 3 key terms I should know.
```

28 Devil's advocate

```
Here is my plan. Argue against it as strongly as you can, then tell me
which objections actually matter.
```

29 Prepare for a hard conversation

```
I need to talk to [person] about [issue]. Give me an opening line, 3
points to make, and how to respond if they get defensive.
```

30 Learn in 20 minutes

```
Create a 20-minute crash course on [topic]: 5 core ideas, one example
each, and a 3-question quiz at the end.
```
